trade fair for packaging,  
printing and filling technologies

**UPAKEXPO**

Venue:

Organizer:

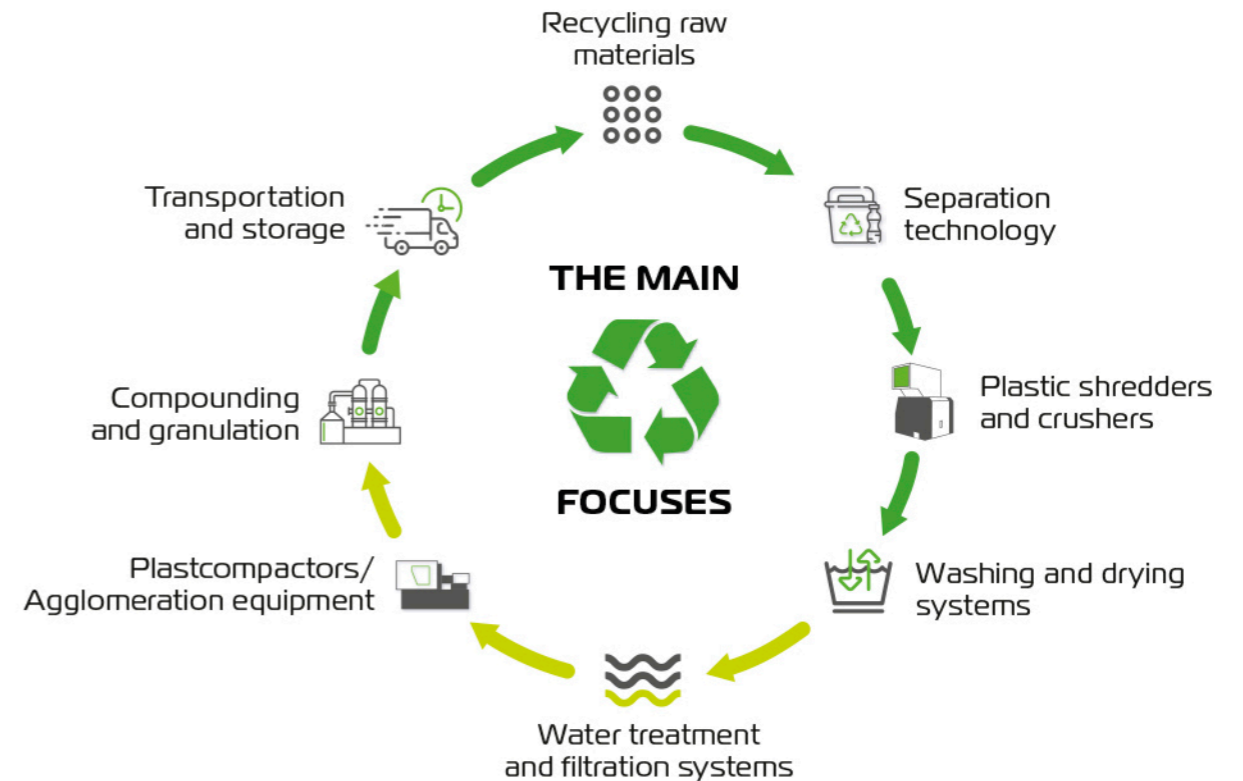

# RECYCLING SOLUTIONS

THE CONCEPT OF CIRCULAR ECONOMY IS GAINING MORE MOMENTUM

## RECYCLE! TAKE - MAKE - DISPOSE

Today, we see more and more manufacturers of packaging and polymer products following the global circular economy trend. Experts note the growing market interest in the life cycle of the materials used (whether plastic, paper, glass or rubber), secondary consumption of resources, their processing and return in the production process.

Current Linear Economy model of «Take-Make-Use-Throw» is no longer sustainable and widely replaced by the more efficient and environmentally friendly recycling. The increasing relevance of this topic became the main driver of **RECYCLING SOLUTIONS** exhibition launch, which during its existence has turned to a key meeting point for the professional community of recyclers.

## FACTS AND FIGURES RECYCLING SOLUTIONS 2024\*

>1142  
exhibitors

18  
countries

30 000  
visitors

\* together with Ruplastica and Upakexpo
